SUMMARY

Data scientist with 5 years of experience shipping ML models for pricing and demand forecasting. Built models that added \$4M in annual revenue and cut forecast error by 22%.

TECHNICAL SKILLS

Languages: Python, SQL, R
Machine Learning: scikit-learn, XGBoost, PyTorch, Time-series forecasting
Data & MLOps: Spark, dbt, Airflow, SageMaker, Snowflake

EXPERIENCE

Senior Data Scientist <i>Cascade Retail</i> - Built a gradient-boosted pricing model across 40K SKUs, adding \$4M in annual revenue - Reduced weekly demand forecast error (MAPE) by 22% with hierarchical time-series models - Deployed models to production on SageMaker with automated drift monitoring	Mar 2022 – Present Seattle, WA
Data Scientist <i>Northpeak Insurance</i> - Developed a churn model that let retention teams save 8% of at-risk policies - Automated monthly reporting in Python and dbt, saving analysts 30 hours per month	Jul 2020 – Feb 2022 Remote

PROJECTS

Open Transit Delays <i>Python, XGBoost, Streamlit</i> Public dashboard predicting bus delays from GTFS feeds, 15K monthly visitors
--

EDUCATION

University of Washington <i>M.S. in Statistics</i>	Seattle, WA 2020
UC San Diego <i>B.S. in Mathematics</i>	San Diego, CA 2018

CERTIFICATIONS

AWS Certified Machine Learning – Specialty <i>Amazon Web Services</i>	2023
